

# Overview

*Always A Part of Something Bigger.<sup>SM</sup>*

We work for OEMs and specialty product providers in need of innovative component developers to manufacture custom brass and copper components.

## What We Do

- Work with existing designs to quickly manufacture high-quality parts.
- Partner with OEMs to expertly develop custom component solutions.
- Provide proprietary designs – ready for niche or smaller OEM customers.
- We develop customized fittings and components that either: *Solve a problem or Increase the value of the end-user product Many times both.*

## What You Gain

- A finished part that meets all product and quality specifications.
- Fast turnaround time.
- Bringing newly developed products to market faster.
- Capturing and/or converting a segment of your targeted market.
- Avoiding development time and costs.
- Competitive edge in your marketplace, quicker to revenue.

*We're a manufacturer in the business of providing:  
strategic advantage for our customers.*
